

Cuba Today

By Shomit Sirohi

Introduction

In fact an official statement sent by Che to CPIM and CPIML, was that we meet in a hotel in Cuba in three years and with Sirohi, and that is finally after 5 years of

planning Cuba as wealthy and with a lot of legal deals to be made with Sirohi expressing his love for Cuba, even Cuban healthcare needing his attention.

I. Viejo and Colonial City in the past

Cuba, Havana is then a long history of plantation labour in the countryside which is black poverty in Havana and is then Viejo architecture and colonial architecture from its Spanish period in the past, joining Hispano-America.

II. A Havana Fables

Imagine entering the city and seeing a Che building and then joining the city in historical revolution which is just its culture and in fact the process of organic turns and living architecture and even Spanish being spoken by white people and black people in a constellation of in fact elements of revolutionary culture – like Hotel Nacional, La Casa De America, Marquez film institute and even Institut Havana recently which then unfolds as Havana's cultural centers and is also with the old Havana university and poor housing with the recent Plaza de Mayor and such complex plazas.

III. Cuba today

With this history, becoming today the process of Fidel Castro and Ernesto Che Guevara alive and militant again, with protests, and picketing culture heating up Cuba to even peasant protest and deals with Sirohi on Havana Club manufacturing, car manufacturing and even rums, olives, cooking and Platinov curation and Thessaly, sticks and spaghetti forming in its culture.

IV. Cuba Today then

In fact Cuba is today what it was in Ortega y Gasset yesterday, it is the same old Havana – I imagine it to be the current plan that there is always a work of art to appreciate –

“Revolution is ongoing, and artistic, even cultural and is the highest plan from Sirohi, I mean we are innovating on the whole city of Havana as it is in fact no longer poverty, but what Sirohi calls European and believes it is Communism.”

In fact then the whole study of Havana is also La Habana today which means a type of hotel culture of poor buildings and intersections and old cars passing by.

III. Meeting Sirohi

In fact Sirohi is fine and ready to meet, and is meeting EU soon –

with Hegelesia and in fact this is confirmed but his point is that elliptically we have met and philosophically we are objective and that is because he is a scholar who is profound – he even thinks Cuba is now with 100 billion on agricultural deals with 400 billion on film institutes and so it averages actually as 200 billion because of legal formalism and is just a wealthy culture after years of loss culture in fact which is now profitable culture and is unique somehow like a film which I call recent mass protests and charged protests only that.
